Empowering Research Faculty

Georgia Tech has launched an initiative to recognize and develop its research faculty, who comprise 60% of the nearly 4,400 total faculty currently employed at the Institute.

Has the James Webb Space Telescope Changed Astrophysics?

That was the question posed by Neil deGrasse Tyson to a panel of leading experts, including Georgia Tech Physics Professor John Wise.

Executive Director Named for Scholarships and Financial Aid

Katie Conrad comes to Georgia Tech from Florida International University. She begins her new role July 1.
Campus Updates

Keep Up With Construction
The Georgia Tech campus is ever-evolving. Check the Infrastructure and Sustainability site to keep up with the latest projects and possible detours.

When the Whistle Blows

This year’s annual remembrance ceremony honored 18 students, faculty, and staff members who died in 2023.

Faculty/Staff Achievements

**Chunhui (Rita) Du** has been awarded a grant by the U.S. Department of Energy for her research into quantum sensing. The grant, awarded for "Nanoscale Quantum Sensing and Imaging of Topological Magnets," will provide funding for the next three years.

Through his novel approach to combine simulation data with real-world ground truth data to train more capable robots, Assistant Professor **Sehoon Ha** has earned the National Science Foundation CAREER Award. The award is one of the most prestigious honors a junior faculty member can receive.

**Andrew McShan**, assistant professor in the School of Chemistry and Biochemistry, has been awarded a prestigious Curci grant for research in cutting-edge cancer treatments. The new funding will provide two years of support for McShan's investigation into developing the next generation of universal immunotherapies.

**Jud Ready**, principal research engineer at the Georgia Tech Research Institute, has been selected to join the National Academy of Inventors' 2024 Class of Senior Members – a group of 124 academic inventors who have made significant contributions to innovation and technology.
